

Specification Sheet

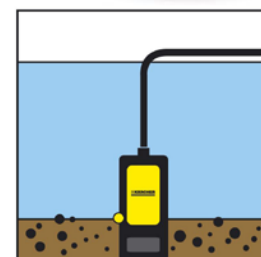

Drainage pump

SDP 7000 Submersible Dirty Water Pump

An entry level water pump designed to remove dirty water with particles up to a max size of 20mm at a high speed. Can be used in ponds, pools, flooded areas etc.

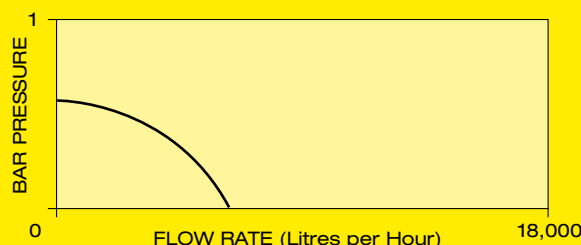

Unique Selling Points:

- **Innovative Kärcher quality**
User friendly, robust & powerful and built to the highest quality & performance.
- **Float switch**
Water level monitoring by means of a float switch allows the pump to work automatically between two predetermined levels.
- **Integrated handle**
For easy transportation & storage.
- **Hose connector**
Offers ease of hose fitting to minimise thread damage.

Submersible dirty water pumps

max. output **7,000 l/h**
