- ✓ Long lasting effect at a broad temperature range
- ✓ Quick and easy application
- ✓ Safe for people, plants and the environment

Application

↶ To be used in a **preventive strategy**:
→ BEFORE detection of aphids in the crop

↻ Releases → **Every 3 weeks**

Ⓜ Crop area covered per tube → **200 m²**

📅 Tubes must stay in the crop
→ **At least 4 weeks**

✓ Protection of:
→ **Raspberries and other soft fruits**

Dedicated solution for covered berry crops

BerryProtect is designed to protect covered raspberry and other berry crops (in tunnels, glasshouses, rain-protection systems) against aphids using parasitic wasps. The mix of different species of parasitoids used in a preventive way allows an immediate control of the aphids as soon as they appear in the crop.
